Education

Harcourt Butler Technical University, Kanpur

B.Tech in Information Technology | CGPA: 7.24

2023 – Present

Kanpur, Uttar Pradesh

Siddharth Public School

Intermediate (Class 12) | 75%

2020 – 2022

Siddharth Nagar, Uttar Pradesh

Siddharth Public School

High School (Class 10) | 81%

2018 – 2020

Siddharth Nagar, Uttar Pradesh

Achievements

- Secured **10th position** among 100+ teams in Smart India Hackathon 2025 Internal Hackathon at HBTU Kanpur.
- Active coder on LeetCode with profile: **vchbtu71**; solving DSA problems.
- Contributed to real-world SIH project **SafeCred** as a Frontend Developer.
- Built multiple full-stack applications using **MERN** stack.

Projects

SafeCred – AI-Assisted Credit Scoring System | *Frontend Developer, React.js, Next.js, TailwindCSS*

[GitHub](#)

- Developed the frontend for an AI-powered microfinance credit scoring platform providing instant loan decisions using ML-driven risk assessment and proxy data signals.
- Built responsive multi-step application forms, document upload workflows, and integrated frontend with FastAPI-based ML service and Node.js backend endpoints.
- Contributed to production-ready UI/UX, improving loan processing accuracy and enabling automated low-risk approvals for underserved borrowers.

Amazon AI Store Clone | *React.js, Node.js, Express.js, MongoDB, TailwindCSS*

[GitHub](#)

- Developed an Amazon-inspired e-commerce platform with modern UI, product listings, cart system, and secure checkout flow.
- Integrated backend APIs for user authentication, cart operations, and product management using Express.js and MongoDB.
- Implemented responsive UI components with TailwindCSS to improve user experience and enhance frontend performance.
